Introduction

Who is this eBook for?

This is for those who are aware of Bearableguy123 (the reverse account also), Mr Pool, RippleRiddler, Howard Moon and others who are known collectively as "Riddlers" which are present in the XRP community. Those reading this document are likely solving riddles, or at least attempting to.

Points to note and bear in mind while reading and understanding this document

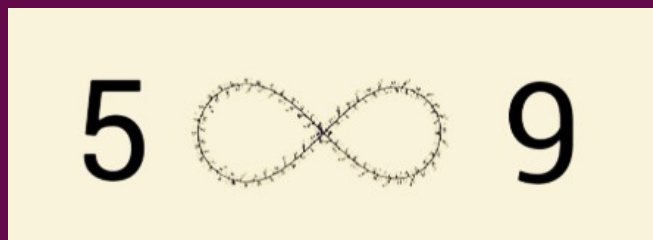

Some screenshots may show dates differently from what you see, a difference in timezone will likely account for this. Some screenshots taken will be on UK time, please check this before assuming something is incorrect.

589

Bearableguy123, amongst others showed us 589, here in the example below we can see 589 on the whiteboard but the 8 is clearly different as its displayed as snakes.

As 589 is not entirely displayed as a simple constant font, the 8 in this case means infinity, so it would read as:

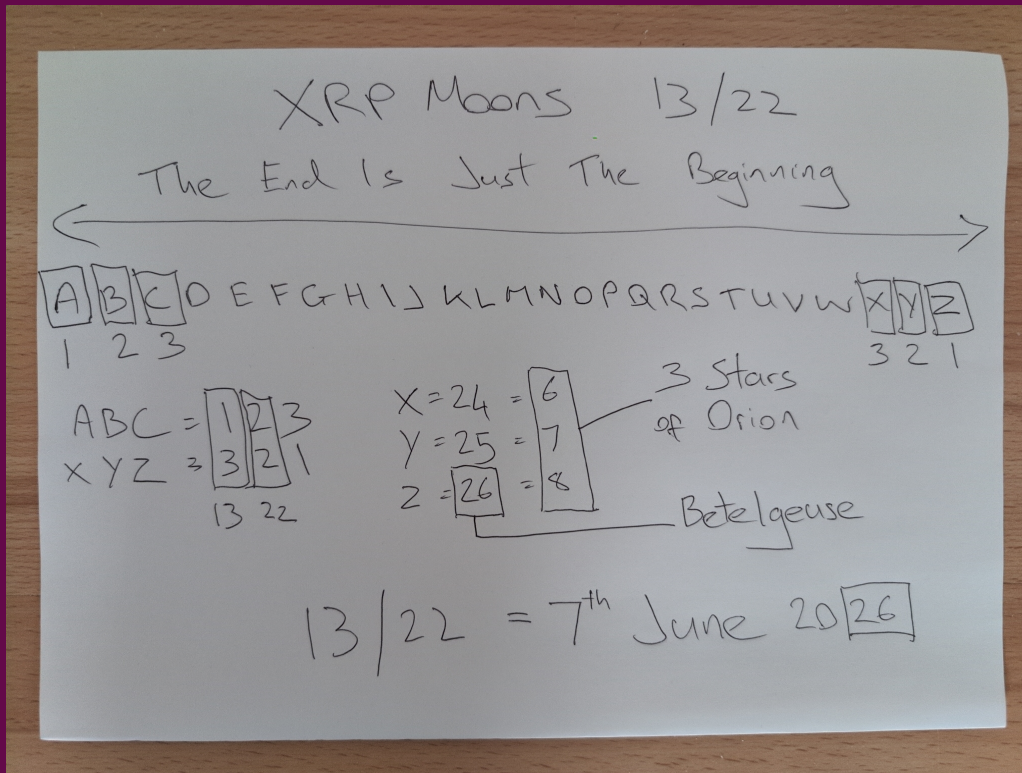

This now means 5 "infinity" 9 meaning 5 678 9 (infinity meaning all numbers between 5 and 9 in this case).

Next lets connect it to 13/22

13/22

To connect 589 or "5 678 9" to 13/22. The, rather crude, diagram shows us how.

To connect 589 or "5 678 9" to 13/22. The, rather crude, diagram shows us how.

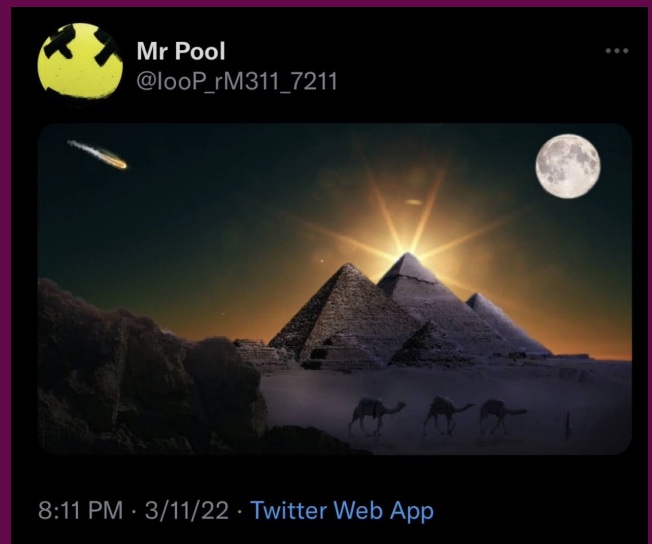

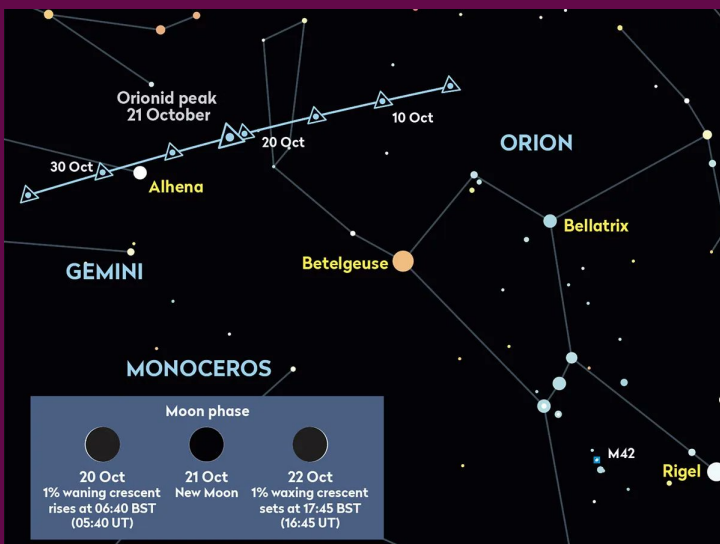

ABC = 123

XYZ = 321

13/22

Looking vertically the 1 lines up with 3 and the 2 lines up with the other 2, giving us 13/22

The end (of the alphabet) is just the beginning (of the alphabet). If you were to fold the paper around so the X lines up with the A if would all fall into place, also showing a continuous circle or infinite loop.

123 321

Lets continue this 123 321 idea further. 321 gives us a date of the 7th June 20[26] as per the diagram.

Does 123 give us anything interesting?

123 on the clock would result in:

1 = 7

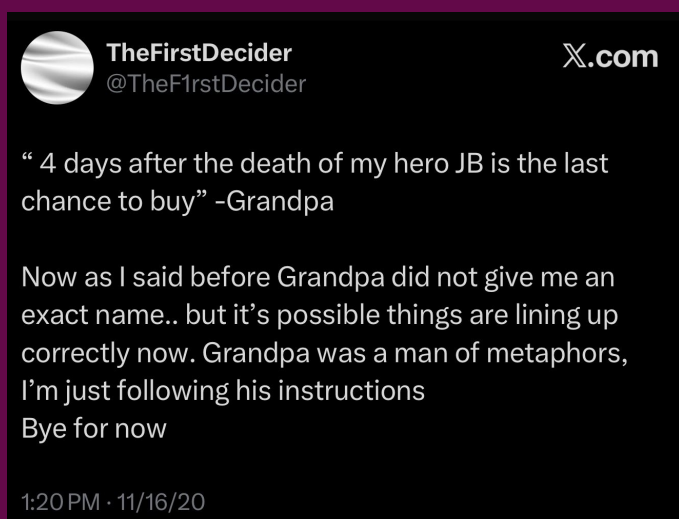

2 = 8

3 = 9

From our decode of 321 we have 678. The 7 and 8 are common to both but the 6 isn't. What could this mean? Looks like it means flipping the date format to UK dd/mm/yyyy.

From 789, we already assigned 8 to being the year 26 as 2+6=8 which leaves us with 7 and 9 which we decided was the day and month respectively, so 7th September 26.

So could we find anything relating to the 7th September 2026?

123 321 - continued

Could it be that JB from TheFirstDecider's post means Jachin and Boaz the two pillars of freemasonry which can be seen to represent various polarities?

"4 days after the death of my hero JB is the last chance to buy" -Grandpa

Perhaps this is a reference to the twin tower attack on 11th September 2001. According to Grok 18 people with the initials JB died in the attack that day. They were bound to be heros to someone.

$1+8=9$

So if we carry this theory forward 4 days after the twin towers fell would be the 15th.

Breaking this down we can see that $5=2+3$ giving us the magical number 123. But we know that 123 321 also gives us the 7th June 2026. If we look back four days from the 11th September, wow, look at that, we end up on the 7th.

123 321 - continued

From @bearableguy123's header banner we can see there are two snowballs showing from the original 3.

Could this ultimately mean that we have the dates for both snowballs?

Yes, potentially. But there's more...

123 321 - continued

So now we have two dates which could represent the two remaining snowballs on @bearableguy123's X header banner.

Lets have a closer look at these dates.

7th June 2026 to 7th September 2026 is a difference of 93 days.

Lets take the midway point. Why? The June 8th moon cycle looks like its half dark and half illuminated, the first date we have is at the halfway point of the year and we're just being curious.

$93/2 = 46.5$ days.

June 7th 2026 + 46 days = July 23rd.

On the clock $7=1$ so July would be January, or 1/23 (123).

We now have a new date of the 23rd July 2026.

These dates contain three sevens, 777.

Wealth and Financial Prosperity

777 is strongly linked to financial abundance and prosperity. Multiple sources confirm that this number signifies positive financial changes on the horizon, especially if you've been putting in consistent effort. It's a sign that your hard work is about to pay off, potentially through unexpected gains or new opportunities.

The number encourages a positive mindset and openness to wealth. It's not just about money—it represents spiritual wealth too, where true abundance comes from alignment, purpose, and inner fulfillment.

From and including: **Sunday, 7 June 2026**
To and including: **Monday, 7 September 2026**

Result: 93 days

It is 93 days from the start date to the end date, end date included.

Or 3 months, 1 day including the end date.

Alternative time units

93 days can be converted to one of these units:

- 8,035,200 seconds
- 133,920 minutes
- 2232 hours
- 93 days
- 13 weeks and 2 days
- 25.48% of 2026

From **Saturday, 7 June 2025**
Added 46 days

Result: Wednesday, 23 July 2025

Jackpot and Luck in Gambling

In popular culture, 777 is synonymous with winning the jackpot, especially in slot machines. This association extends beyond casinos—seeing 777 in daily life (on clocks, receipts, license plates) is often interpreted as a cosmic green light for luck.

123 321 - continued

So we now have three dates, and the third one lands on a 123 date, what are the chances of that?

Can we connect this date of 7th July 2026 to anything riddler related?

Looking at the date of this @RippleRiddler post it shows 24th July 22. Or 23rd in a different timezone (US).

Very interesting that the July date of 23rd July 2026 ties back to this post extremely well. Just a one day difference.

Now that we have three dates still to pass in 2026, this means that @bearableguy123 didn't show us the 4th one. As one snowball from the original three has already been removed.

So you're now a player at the finish line, do you want to hold till September to reach the final date for 2026?

Can we find anything else that would boost support for July 23rd?

How about this post from David Schwartz?

He posted this on the 23rd January (123) 2026 and the "Moon Ball" is upside down. What's he trying to tell you?

Turn it the opposite direction, ie. turn one number the oppsite direction. If we turn the January (1) to the opposite direction (on the clock) we get 7 (July).

January 23rd now becomes July 23rd.

 **Ripple Riddler**
@RippleRiddler

You are player on the finish line, the most difficult section. You may win, but the prize is unknown.

You receive an offer to finish The Game, with a guaranteed result and profit, that suits you and will change your life.

You know that your choice will bring fun.

Choice?

Megadeth

Megadeth, lead by legendary frontman Dave Mustaine, released their final album on 1st January 2026 (123).

"The end is just the beginning"

The end of Megadeth releasing new material at the beginning of the year.

[D]ave [M]ustaine

D=4=22

M=13

13/22

The announcement about Megadeth's final album and farewell tour was announced on 14th August 2025.

1+4=5

August=8

5+8=13

Metallica

Metallica have been touring to promote the release of their album M72.

They have been scheduled to play two dates per location. The September 1st and 3rd dates were changed so they played the 1st and 9th September.

These dates on the screenshots are interesting, the first and 3rd (13) of September (9). Also the location, Phoenix. XRP is known as the Phoenix that will rise from the ashes.

$$13+9=22$$

$$13/9/22$$

$$13/22$$

The M72 album concept is about Metallica being a band for 72 seasons.

$$M=13$$

$$72=9(7+2)$$

$$13+9=22$$

How many seasons are there?

4 seasons.

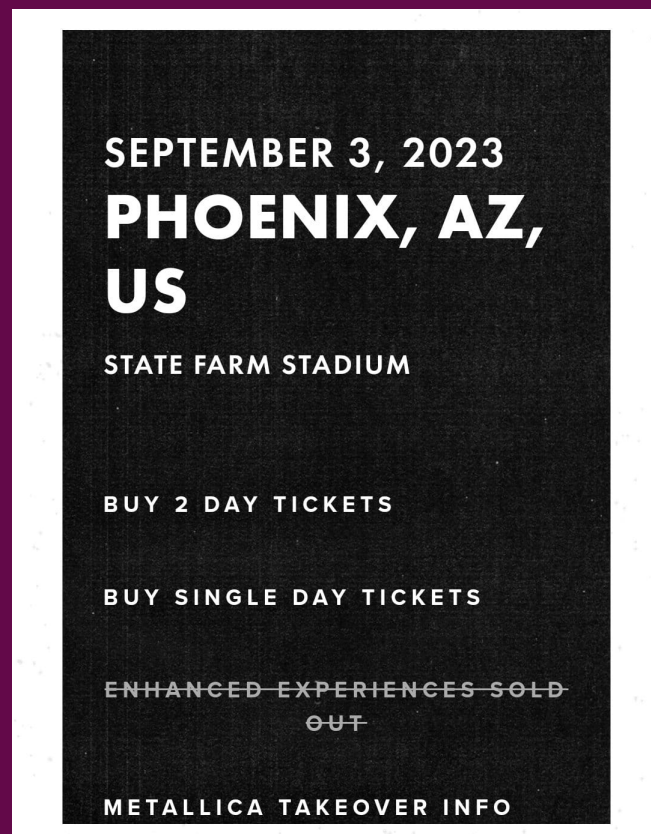

$$13+9=22$$

$$2+2=4$$

$$13/9/22$$

$$13/22$$

$$M72=13/22$$

Metallica - continued

The September 2023 tour date actually gives us one of our moon dates of the 7th September 2026

September 1st 2023

September =9

1=10 (add zero)

10=2026

2023=7

Giving us 7th September 2026

September 9th 2023 could also be manipulated too.

September=9=6

6+9=15

5=2+3

123

Then follow 123 321 solution and remember that 2023 =7

Price - NOT FINANCIAL ADVICE

So what about price predictions?

The image below has four rows which some may suggest is price points for different dates. As the first snowball has been removed from @bearableguy123's header banner it would suggest this is either incorrect or plans changed. Lets take a different point of view.

"X5X2X0X2X"

$5+2+0+2=9$

The numbers likely mean 9, meaning September. (2026)

There are 14 "X" characters in total

$1+4=5$

5 digits in September is potentially what this means.

Conclusion

Ultimately we have ended up with 3 dates which connect to each other extremely well.

We have the following dates:

6/7/2026 (7th June 2026)

7/23/2026 (23rd July 2026)

9/7/2026 (7th September 2026)

But @bearableguy123's header banner originally had 3 snowballs and now has two. How does that work? Simply put, @bearableguy123 didn't tell you there was actually 4 snowballs in total. So by the time the two remaining snowballs are removed this is when you are the player at the finish line as per @RippleRiddler.

This is when you'll have a choice to make, do you hold and continue to play the game or do you wait for the 4th snowball on the 7th September?

Choice?

Conclusion continued

June 7th 2026 seems like the mostly likely date for something to start to happen based on these decodes and interpretations. June was hinted at by @bearableguy123's Owl Jolson "I love to singa" cartoon image (below).

"I love to sing-a about the moon-a and the June-a and the spring-a"

In addition to the number of XRP references in Top Gun Maverick there is also the scene were Maverick says to Rooster "I need you to flip this switch when the needle gets to 120"

120 = 12 = 6 (on the clock)

6 = June

6=9 (inverted)

9=September

"The end is just the beginning", meaning 321 is the end and the beginning date being 7th June 26

Looking at it from an alternative point of view, "The beginning is just the end", meaning 123 is the beginning and the end date being 7th September 26

Fingers crossed and eyes on June, July and September.

Addendum

As part of the SEC V Ripple case, XRP was ruled not a security.

The key ruling that XRP was not a security in secondary market transactions was issued on July 13, 2023, by U.S. District Judge Analisa Torres in the SEC v. Ripple Labs case.

2023=7=7th (2+0+2+3)

13=10+3

10=2026 (2+0+2+6)

3=9 (on the clock)

9=6 (inverted)

9=September

6=June

The date XRP was ruled not a security contained two other dates mentioned previously:

7th June 2026

7th September 2026

Add ten days to 13th July 2023 and that gives you 23rd July, the other date previously mentioned.

Addendum Continued - Mr Pool Disappeared

Speculation that Moon date is the day Mr Pool left is August 6th.

If we reinterpret this date we can align it with with the dates discussed previously.

August 6th:

8/6, 8=8th, 6=6th. We already have a date of the 7th of June 2026, the day after is the 8th, so 7th-8th June 2026

Addendum Continued

How do we solve this?

1/23 - 3/23

We have our dates from earlier so we know the only moon date for the 23rd is in July. On the clock 7=1

So we now have 7/23

for 3/23 simply add the numbers:

$3+2+3=8$

8=August

So what it means is:

23rd July to August 1st

But you already know that you're a player at the finish line before August!

Watch Closely - April, May, June July, Watch Closely

W=23

C=3

W+3=Z

Meaning "W" + last three letters ending on "Z", so XYZ

Using our dates calculated earlier the riddle can now be updated to:

Watch Closely - June, July, August, September - Watch Closely

Note that from the original "April, May, June, July" only two months with moon dates were shown. But with the updated riddle all three months with moon dates are shown while keeping 4 months in the riddle. All that's happening is we shift along two months.
